Customs in Turkey

Last year I went to Turkey on vacation. It was an amazing experience. I spent three weeks traveling there but the best part of the vacation was Istanbul. It was fascinating to walk along the city streets and observe the contrasts between different people. Groups of women were covered in black from head to toe with only a small space for their eyes. Other women dressed in short skirts and bright colors. Men kissed each other when they met. Men spit in the street. Some boys dressed in the latest fashions, other boys dressed in long robes.

In the bazaar people pushed past each other without saying sorry, but in every shop they offered us a cup of tea. The only situation I found really uncomfortable was when people talked directly to me and stood right next to me with their faces only a few inches from mine. Coming from England, I'm not used to people standing so near.
