

## Using *Longman English Assessment* for Placement into Longman Multimedia Programs

The tables below allow you to use *Longman English Assessment* scores to place students in Longman Multimedia programs.

*Longman English Assessment* has four components:

1. Find Your Level, which provides students with an initial level placement (Beginning, Intermediate or Advanced)
2. Listening skill test for each level
3. Reading skill test for each level
4. Written Structures skill test for each level

After taking a skill test at the appropriate level, a student will be given a more detailed level: **Low**, **Mid**, or **High**. For example, a student who takes a Beginning-level skill test may have a resulting score of Low Beginning, Mid Beginning or High Beginning, with respect to that skill.

### How to Use the Placement Tables

To use the placement tables, read from left to right. In the example below, the learner scored Mid Beginning on the Listening skill test and High Beginning on the Reading skill test. These two scores result in a *Longman English Interactive 2* (LEI 2) placement.

**Example:**

Result on Interest and Ability Test	Result on Corresponding Level Listening Test	Result on Corresponding Level Reading Test	Placement
Beginning	Low Beginning	Low Beginning	LEI 1
		Mid Beginning	LEI 1
		High Beginning	LEI 1
	<b>Mid Beginning</b>	Low Beginning	LEI 1
		Mid Beginning	LEI 1
		<b>High Beginning</b>	<b>LEI 2</b>
	High Beginning	Low Beginning	LEI 1
		Mid Beginning	LEI 2
		High Beginning	LEI 2

(Key: LEI = *Longman English Interactive*)

**Note:** While *Longman English Assessment* offers **three** skill tests—in Listening, Reading and Written Structures—some teachers, schools or learners may choose to use only **one** or **two** skill tests to generate a placement recommendation. The following tables provide placement recommendations if the learner takes only a Listening test, the Listening and Reading tests, or all three tests.
