

Listening Strategies

For the Teacher

The Listening Strategies are intended to supplement and support the Listening Comprehension activities that appear in either lesson 3 or 4 in each unit of the Student's Book.

The worksheets help students learn and practice useful strategies for listening more effectively. Each activity is designed to support the listening task in the lesson. However, students should be able to apply each strategy they learn in subsequent Listening Comprehension activities as well.

Directions for when to apply the Listening Strategy activities are included at the top of each worksheet.

Note: All page references are to the Student's Book.
