

## Objectives

Now you have completed your needs analysis, how can you use that information to improve your English?

You need to think about the objectives you need to set yourself, how you can achieve these objectives and how long it will take you to do this.

Working in groups, discuss ways of learning that will help you improve. For example, to help you remember vocabulary, try using word association – rhymes or pictures. Put the information in the first two columns.

Objectives	Study tip	Date
e.g. remembering vocabulary	e.g. Use word association – using pictures	e.g. on going

When you have finished, set yourself a deadline and put it in the final column – and try and stick to it!
